

# NEWSLETTER OCTOBER 2007

## Better prices for the new Combi cap, white and transparent!

The cosmetic industry chooses our caps more often for different products. Important volumes allow us to produce more economically, reducing production cost. This advantage gives us the opportunity to offer our customers better prices, even for small quantities! We can also adjust the prices for the over cap. Do you know our assortment?

## The screw caps are even more transparent and resistant to chemicals!

We have changed the material for our « Softline » screw caps to SAN. The production with the former pellets will gradually be stopped. The new pellet SAN offers different advantages, including better transparency, resistance to deformation as well as chemical resistance. Therefore, you profit not only from high quality but also from a favourable price.

## New in our assortment

The Kombi screw cap TA2915x for 30mm tubes. Suits every M15 thread and is available in different outside shapes such as glossy, mat and chequered.

## NEW Combi caps, perhaps in other diameters?

Are you looking for the special combi cap? Another diameter? We are looking forward to develop, together with you, such a new version. Please contact us for any further questions, also on this regard.
