

NEWSLETTER MAY 2008

The Team is increasing

In the beginning of this year the RUBA sales team was completed by Ms Maïke Feldhoff and Mrs Bina Liguori. Ms Feldhoff is main contact for all kind of question or information concerning offers and orders. Mrs Liguori is very experienced on the sector of plastic materials and supports our team as assitant general manager in services like marketing and sales.

MyCap by RUBA

Nowadays we are able to built/produce all RUBA caps with individual outer shape. It only takes a few days to realise your demands on request. If you are interested in receiving a board of [MyCap](#) samples please contact us.

Our new cannulae closure C4815, injected outside

In response to several customer requests our tool construction service has built a new mould for cannulae closures for tubes and bottles with a diameter of 50 mm. Currently we provide these caps with ribbed shape but soon we will add mat or glossy shapes. If closure C4815 is considered to awaken your interest we will be pleased to send you some samples.

Simplification of our production process by the use of new silo

Our new silo for base granulate has been successfully finished, filled and put into operation. As a result of the higher level of automation we can ensure a more effective production process and can offer great quantities for an attractive price. Besides this, we created more storage capacity for our finished products. Contact us – it's profitable!
