

# NEWSLETTER MAY 2013

## New employee

In October, we were allowed to recruit Krasniqi Kurtish as a new employee.

He is active in the production and thus responsible for the production of closures.

**We wish him much joy at work!**

## New employee

In February Sascha Jauslin started her internship in the office. She is very helpful and a good team player. At the beginning of August she will begin her official apprenticeship.

**We wish her also a lot of fun at work and instructive time with us.**

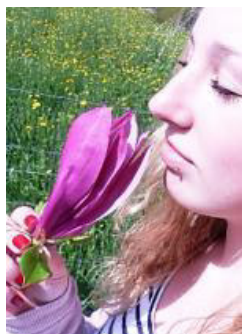

## Good Manufacturing Practice

GMP (Good Manufacturing Practice) applies to all quality-relevant steps in the GMP life cycle of a product, starting with the trial and ending with the delivery to the market.

## Alternative raw materials

### For our products we use only quality polypropylene.

If the customer registered material can not be delivered because of delivery problems, replacement material must be used. Without replacement material we can not produce it.

## News from our company

Fragrant caps for attractive packaging. Ever heard of it? We have tested it.

For the production of caps with fragrance additives material fragranced polypropylene homopolymer is used.

There is a way to incorporate the fragrant caps into everyday objects, such as cosmetics or plastic packaging. The above examples of the use of scented locks are so diverse that it still can be transferred to any other areas of daily life.
