

# NEWSLETTER JUNE 2014

## Mr. Christoph Freivogel celebrates 30-years anniversary at RUBA

For 30 years we can count on the know-how of Mr. Christoph Freivogel. He works as a toolmaker and he had the opportunity to learn of RUDOLF BAUMGARTNER. He is also responsible for the design of new tools, where he can work with CAD/CAM system.

We appreciate his professional work and wish him continued good time with us.

## RUBA sample boxes

Since the beginning of May, you can ask by us for one of the free sample boxes. There you will find all available RUBA caps, in all possible outside shapes and forms. This gives you also a good opportunity for your sales department to see and have the caps in original size and real version.

The caps in the boxes are sorted according to the diameter as follow: **Ø 50-40 mm & Ø 35-30-25-22-19-16 mm**

## Caps with logo / My Cap

You can make your completely own cap by us. A few samples you can see [here](#).

Our modern tool department allows you quickly and favorable engrave a logo of your choice on a form. So you may realize with our help your very special and unique cap. Our caps are **inside** injected and therefore are ideal for a finishing process.

**Barcode on the pallet label**

At the request of our customers we can display a client bar code in the blank space of the pallet label.

This simplifies the logistic and also the incoming control.

**Even more transparency...**

Again and again we provide a new tests within a new materials. This time it was a new, innovative polypropylen which is very easy to apply and very suited for all of our caps. The tested resin has become much more transparent.

You will notice the difference immediately:

**Apprenticeship as commercial merchant**

The end of June has our commercial trainee Mr. Xavier Kleyvson successfully completed his apprenticeship as a merchant.

**We wish him for future work and live good luck and all the best!**
